Profile

As a Java Developer I bring creativity and focus to everything I do, always looking for ways to grow and make things better. I'm all about finding effective solutions and making a positive impact also enjoy learning and solving problems.

Education

Genba Sopanrao Moze College of Engineering, Balewadi **2022 – 2026**
Bachelor of Engineering in Information Technology (IT) *CGPA: 8.64*

Azad Vidyalay, Kasegaon **2021 – 2022**
Higher Secondary Certificate (HSC) *64.83%*

English Medium School, Palus **2019 – 2020**
Secondary School Certificate Board (SSC) *88.80%*

Technical Skills

Languages / Frameworks: Java, Spring, C, HTML5, CSS, JavaScript (Basic), Bootstrap (Basic)

Databases: MySQL

Tools: VS Code, Eclipse IDE, Apache Tomcat, Git, GitHub

Soft Skills: Problem-Solving, Strong Communication, Documentation, Teamwork

Projects

Support Ticket Management System **2026**

- Built a role-based support ticket management system using Spring Maven, JDBC, and MVC architecture.
- Enabled customers to raise, view, and track tickets with real-time status updates.
- Implemented admin functionalities to manage users, assign tickets to staff, and monitor ticket progress.
- Developed staff dashboards to resolve issues efficiently while maintaining complete ticket history.
- Used MySQL for database management and JSP, HTML, CSS, and Bootstrap for responsive UI design.

Student Management System **2025**

- Designed and built a Console-based Student Management System using Core Java.
- The project successfully implemented CRUD functionality for reliable data handling (adding new students, retrieving lists, modifying records, and deletion).
- Focused on object-oriented programming (OOP) concepts like classes and methods.

Portfolio **2025**

- Designed, developed, and launched a comprehensive personal portfolio website from scratch, utilizing semantic HTML, modern CSS, and JavaScript.
- Managed the deployment process using Git/GitHub and Netlify, ensuring cross-browser compatibility and a fast load time.
- The site effectively presents diverse project work and technical proficiency to potential employers.

Internship

Cravita Technologies, Pune **Junior Software Engineer Intern**

June 2025 – Present

- * Assisting in backend development using Java, following object-oriented programming (OOP) principles.
- * Writing and optimizing SQL queries to ensure efficient data handling and reporting.
- * Working on web applications using HTML, CSS, and JavaScript to enhance UI and overall user experience.
- * Working with Spring Boot architecture, including controllers, services, and repository layers.
